### ***Drawings***

Fig. 2 is objected to under 37 CFR 1.83(a) because they fail to label the related boxes as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

Claims 9, 12, 14, 15, 18, and 19 are objected to because of the following informalities: it is suggested to change "**claims**" (lines 1, respectively) to - -claim- -

Art Unit: 3661

because claims 1, 3, 7 are not all inclusive ("or" suggests 'either'). Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

Claims 1 – 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 3, 7, 18, and 20 – 27, the phrase "**capable of**" makes optional the limitations following the phrase and does constitute a positive limitation in any patentable sense. Claims linked to the above rejection are necessarily rejected.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 25 – 27 are rejected under 35 U.S.C. 101 because a "program" is merely a set of instructions that are executable by a computer. The "program" itself is not a process and, in the absence of a "computer readable medium" needed to realize the program's functionality, is non-statutory.

***Allowable Subject Matter***

Claims 1 - 24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art of record fail to teach a vehicle allocation processing apparatus which executes a vehicle allocation processing of allocations to customers in accordance with requests from the customers comprising, among other limitations, request allocation information acquiring section which acquires information requested by a customer and including customer requests delivery time, position and destination information pertaining to a customer; the apparatus further including a discount information calculation section that calculates a discount rate to a charge for use allocated vehicles – the discount rate being executed by a payment processing section.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hirshberg (US 5,289,369) teaches a vehicle allocation system (car rent system) but fails to teach the request delivery time along with calculation of a discount rate as claimed.
